

# HOST CHARACTER LIST - PLAYERS #17-24

## EXPANSION PACK #2

1 male, 4 females, 3 flex (gender is irrelevant), all optional and may be played in any combination with other optional characters.

**These characters are included in the boxed set (party pack): Kits C-E**

Your new player pre-game site is <https://yourmysteryparty.com/goodfriends>. This site will include the main game (purchased separately), expansion pack #1 (purchased separately), and expansion pack #2 players.

The expansion packs should be played in order, as the players are added to the character lists on the free invitation and pregame site in order. You will have expansion pack #1 characters listed on your pre-game site and free invitation with the pre-game site and invitation that comes with expansion pack #2. Therefore, do not assign those to your players if you didn't purchase expansion pack #1.

Always use the host character lists for the packs you've purchased to assign your character roles.

If you skip expansion pack #1, you will not have the replacement card for the player in the main game that has 'read first' on their card for round three. Skipping expansion pack #1 and playing expansion pack #2 will require you to prompt the player from the main game when to read their solution card in round three. It's not a big deal, but it's not optimal – so we suggest playing the packs in order.
